

be deemed unlawful for the Affiant not to report these facts to the proper authorities by way of this affidavit, therefore the Affiant, Dr. Hildegard Staninger®, RIET-1 making report of this knowledge and information.

On Saturday, December 7, 2013 at approximately 13:00 Affiant met with Keri Burnor hereinafter Victim and Witness also referred to as "client" in December of 2012 and have been in communication with her on an ongoing basis for exposure to innovative nanotechnology, bio-sensor devices and bio-agent exposure through professional exposure with intent to kill or initiated a chronic disease state that would lead to death without direct association due to time delay factors.

Affidavit states that specific reports were written by about Keri Burnor's exposures to advanced innovative nanotechnology by Affidavit as listed below:

- Re-Testing of Specific Biological Monitoring Tests exposure to advanced nano materials dated July 23, 2013.
- Toxicological Dysfunction Analysis (TDA) Report dated January 28, 2013.
- Toxicological Evaluation Report Corrected January 16, 2013 Original Report dated December 22, 2012.
- Columbia Investigations Report by Melinda Kidder, PI, CESCO dated December 13, 2012.
- Advanced Materials Analysis Report for Origin of Specimen(s): Chemical Analysis of Mesogenic Bio-Sensory Advanced Materials dated December 13, 2012 Phase I: Photomicrographs; Phase II: Energy Dispersive Spectroscopy (EDS) and Scanning Electron Microscopy (SEM); and Phase III: Raman Spectroscopy/Micro Fourier Transform Infrared Spectroscopy (FTIR).
- Multiple Advanced Bio-Energy Field Analysis results for Patch Test, Hair Comparative bio-energy field analysis from year 2013 to present date.

The results of the analysis for the Mesogenic Bio-Sensory Advanced Materials and the specific parameters found in recent bio-energy field analysis are specific for man-made nano-biosensory innovative nanotechnology and delivery systems. It is of extreme concern for Keri Burnor's health and well being, since the data and results within the reports indicate not only presence of innovative nanotechnology but it has been weaponized as a bio-agent and/or neuro remote sensory technology due to the specific parameters found that coincides with current scientific literature in the field of nanotechnology, bio-agent counter measures and The National Nanotechnology Initiative: Supplement to the President's 2016 Budget per national Science and Technology council, Committee on Technology Subcommittee on Nanoscale Science, Engineering and Technology as published by the National nanotechnology Coordination Office, 4201 Wilson Blvd., Stafford II, Room 405, Arlington, VA 22230. (www.nano.gov) It was an \$18 Billion US Dollar industry per the 2013 Presidential Budget with the participation of DOD, DHS, USDA/ARS, NNI, DOJ, DARPA, DOD and several other agencies as well as global collaborative networks, systems and data collections through asset management systems as well as investment partnering relationships.

To the Affiant's knowledge there have been repeated attempts to murder Keri Burnor, to maim, permanent loss of brain function and monitor her biological presence, genetics and physiological functions via remote sources.

There is intent and that those listed or named in said reports are linked to and specific entity (ies) is/are responsible for this technology being misused, planned and intended to be directed specifically to Keri Burnor through the specific aspects of the innovative nanotechnologies biometric, genetic and architectural design specific for Keri Burnor.

The American Society of Microbiology in their September 15, 2006 – The Science of Prevention Testimony specifically addressed the concern of biological agents (biological/chemical weapons) and their use as a bioterrorism agent for the environmental detection of early detection of infectious disease – whether from natural outbreaks or bioterrorist attacks is critical for curtailing morbidity and mortality. In terms of medical diagnoses, we rely on the medical and public health committees, giving a key role to the federal Centers for Disease Control and Prevention (CDC) for recognizing suspicious disease outbreaks (www.asm.org/), which has been developed into nano delivery systems for non detection through current means. The architecture and signal engineering of the material may be designed and intended for good or bad applications. Specifically in Keri Burnor's case it was used as a bio weapon, chemical weapon, a weapon of mass destruction with specific parameters used to give her rabbit fever, leukemia, breast cancer and/or colon cancer as well as the use of nano-siliconCMOS/MEMS neurospheroid technology used to violate her privacy, to damage her permanently and cause her death.

Keri Burnor was perfectly clear of this technology and since recent tests of porphyrins (other tests pending as of this date of Affidavit) has returned to show a presence of specific nanotechnology composed of hexagonalcarboxyls that are specifically used to make porphyrin nanotubes used in hexagonal waveguides as reported in Phase I: Photomicrograph dated June 22, 2015 and Advanced resonance Analysis Report: Special Request Analysis dated June 6, 2015 were reintroduced back into her system. That she never gave permission for this. That the use of it was for torture, terrorism and hate crimes reasons against her... due to Keri Burnor's unswerving faith in Christ without adherence to the Catholic faith tenets (recent conversion 2008 to Orthodoxy, a heretical act as defined by the

Roman Catholic dogmas....and a means of retaliation by those who she witnessed against in a criminal trial in 2003 against a priest of the Cistercian Order and the Catholic Church)

The earmarks of Jesuit attack are also seen in that Fordham University pioneered the use of nanotechnology and is one of the leading authorities on the subject. That according to Keri Burnor's testimony. (Transcripts of the Trial Case Number Commonwealth vs. Joseph Chu-Cong, that BOTH priests who testified against her were graduates, affiliates or professors at Fordham University. Affiant heard Keri Burnor mentioning her concern that this Saint Joseph's Abbey in Spencer Massachusetts was involved and that this same Abbey had a founder by the name of J. Peter Grace who is also known as one of the leaders involved in Project Paperclip, an operation that furnished a way to assist German doctors of the Third Reich evade the Nuremburg Trials while also assisting with protecting those involved in mind control experiments. German scientists in 1934 developed nanotechnology as micro beads and other related technologies as stated in NANOTECHNOLOGY: A Gentle Introduction to the Next Big Idea by Mark Ratner and Daniel Ratner, Prentice hall, Upper Saddle River, New Jersey © 2003.

Affiant believes Keri Burnor to be of sound mind and that her concerns are legitimate. Affiant has personally seen Department of Homeland Security monitor meetings outside of the building when Keri Burnor was present with Affiant on Saturday, December 7, ~~2015~~²⁰¹³. They were right outside the church building in the adjacent parking lot, which has 24/7 video monitoring of the parking lot.

Affiant believes strongly that swift attention needs to be brought to the issue as children are at risk to the use of BTOP wideband licensing to governmental partners per county areas for testing and monitoring of individuals within a facility as well as

monitoring remotely at home through T.V. and smart meter technology to enhance the electrical potentials and phononics to assist in monitoring the subject and/or parameters being monitored as well as biometrics from a global base link. This can be further stated as taking the thoughts and electrical knowledge banks of ones brain and putting it into a "Brain Cloud" so that one may pick and choose or insert specific thoughts of another into a separate person. This was explained well in the May 2015 Issue of Smithsonian Magazine as well as the interaction of artificial intelligence for virtual reality inserts into a child or adults brain through remote neural monitoring and university collaborative neuroscience and brain implant research.

Affiant in 2012 and 2013 received various advanced nano materials specimens from California, North Carolina, Saudi Arabia and New York. Each of the specimens matched each other, which means that these specific materials had to be aerially dispersed through Geo-Engineering means or the use of specific weaponized technologies through drone and/or helicopter applications. In 2015 testing was done on a nano-siliconCMOS that was dispersed through aerial helicopter delivery applications over the beaches of Long Island, NY in the summer in 2014 and in the fall 2014 in the Caribbean. The designs of these materials through photomicrographic images are similar in architectural design to Keri Burnor's except that Burnor's contained FRET electron paired spheroids that are clearly seen by their green fluorescence as previously stated in reported reports by Affiant.

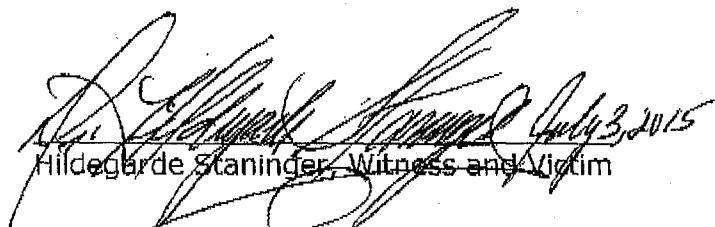

Affiant's business experienced a significant change in economic fluxes, harassment and loss of manufactured products, since the initial evaluation of Keri Burnor in December 2012 to present date.

Affiant also is concerned about the lack of awareness relating to subjects like nanotechnology being introduced to our foods, water, animals, pharmaceuticals and other commercial technologies without consumer knowledge. One single aspect such as waterborne polyurethane (styrene), which is known to cause cancer, has been introduced as "modified food starch" or "microcrystalline cellulose into these supply chains.

Affiant sees Keri Burnor presents to be a woman of high intelligence and skills that only wishes to return to a life of peace again.

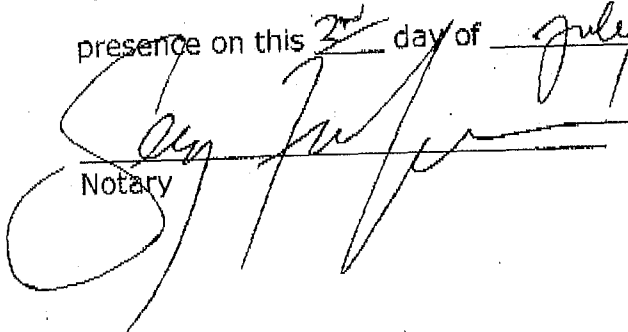

Upon reason and belief, and in Affiant's own professional opinion as an Industrial Toxicologist/IH and Doctor of Integrative Medicine for 36 years, as well as being professionally certified as a Certified Industrial Environmental Toxicologist, and SCADA Professional (and Chairperson of the NREP-SCADA Special Task Force Committee) by the National Registry of Environmental Professionals, Glenview, IL and numerous other credentials, specialized training, text books and awards in the fields of industrial toxicology, toxicological risk assessment, safety, public health and engineering over Affiant's professional career.

Further Affiant saith naught.

Hildegard Staninger, Witness and Victim July 3, 2015

Before me, a Notary for Los Angeles County in the State of California, appeared the affiant, Hildegard Staninger and after making herself known to this public officer by virtue of pictured identification and after swearing to the truthfulness of her statements made in the criminal report herein, and being

apprised of the penalties of perjury, did place his signature hereon in my presence on this 3rd day of July, 2015.

Notary Seal:

A Notary Public or other officer completing this certificate verifies only the identity of the individual who signed the document to which this certificate is attached, and not the truthfulness, accuracy, or validity of that document.

ACKNOWLEDGMENT

State of California
County of Los Angeles

On 07/03/15 before me, Seung H. Kim (Notary Public)
(insert name and title of the officer)

personally appeared Hildegard Stanninger
who proved to me on the basis of satisfactory evidence to be the person(s) whose name(s) is/are subscribed to the within instrument and acknowledged to me that he/she/they executed the same in his/her/their authorized capacity(ies), and that by his/her/their signature(s) on the instrument the person(s), or the entity upon behalf of which the person(s) acted, executed the instrument.

I certify under PENALTY OF PERJURY under the laws of the State of California that the foregoing paragraph is true and correct.

WITNESS my hand and official seal.

Signature [Handwritten Signature]
